(Applicable regulation)		
1. Calculation of the storage days of "the broken bulk consolidated shipment" is calculated		
2. In case the cargo is broken bulk, each broken bulk cargo is dealt with as one		
3. The cargo pieces after ULD break down is taken as loose number of pieces.		
4. The fraction is omitted and calculated when the weight of one piece has "a fraction below		
1 kg." and The weight of one piece calculates the cargo which is less than 1 kg as		
5. "Valuable shipment" and "Dangerous goods" are classified by the IATA regulation, or the		
6. "Keep cool, frozen or warm shipments" need to be ordered by the airline or consignee to		
store them in the sufficient temperature controlled facilities. However, in case		
storage		
capacity is shorted due to high demand and if special measurement is requested		
by the		
airline or consignee, it will be applied additional charges.		
7. For re-stored or temporally stored cargo, free storage term is not applied. The general
