## **NCA delivers first-class booking experience with cargo.one**

**After a swift integration with cargo.one's proprietary technology one.connect, Nippon Cargo Airlines capacities are now available on cargo.one**

Nippon Cargo Airlines (NCA) now offers part of its main deck capacities for e-booking with instant confirmation on cargo.one. Starting today with KZ049/02Jul being the first flight available for booking, customers in key European cargo markets such as Germany, Belgium, France and the UK will have an easy and fast digital access to capacities of the all-cargo airline on cargo.one.

Since when the partnership agreement was signed between cargo.one and NCA in November 2019, both parties have been working closely together to successfully go-live with this e-booking and bring our service quality and speed to the next level. By automatically confirming bookings on cargo.one 24 hours a day, 7 days a week, our customers will now be free from making email exchanges and series of phone calls and waiting for the booking confirmation.

If you are not registered already, please sign-up and get started today to make your bookings for our flights in Europe via cargo.one.

In the course of 2020 we are planning to expand this advanced digital service to also cover other parts of Europe and even to other NCA destinations around the world. Stay tuned for more updates on our website.

By pursuing digitalization and improving convenience, NCA will continue to provide a better customer experience.
